

medicover ESD[®]

The ultimate healthcare flooring system

Barrier-Bac[®]

b. beaulieu[®]
AUSTRALIA

Beulieu Australia is the premier producer of environmentally friendly textile floor coverings in Australia. In 2003 we established our dynamic new carpet manufacturing facility at Yatala in south east Queensland to capitalise on the latest manufacturing technologies and embrace the environmental expectations of the new century.

The decision to develop a "Worlds Best Practice" carpet manufacturing operation that had little or no dependence on water supply made both commercial and environmental sense. The commissioning of the latest tufted carpet technology and the elimination of the enormous energy demands of wet processing have reduced energy consumption to less than one third of that used in traditional carpet manufacturing.

As a result of these initiatives Beulieu Australia now produces the most comprehensive range of environmentally sustainable carpets in Australia.

Beulieu Australia has taken up the challenge of producing a healthcare carpeting system that addresses the specific healthcare protocols, floor performance and environmental responsibilities required, whilst at the same time making a significant contribution to the creation of non-threatening, calming interior spaces for hospitals, nursing homes, retirement accommodation and palliative care facilities.

MediCover ESD® carpet ranges cover the whole spectrum of healthcare requirements from high density, low profile, and low drag resistance loop pile carpets for extreme traffic conditions to the most luxurious LCL custom designs for high end independent living facilities. As MediCover ESD® is a broadloom width carpet (3.66 lm) this reduces the number of joins which eliminates the number of potential hazards throughout the project.

Feature Function / Benefit

The first broadloom carpet to be approved by the National Asthma Council Sensitive Choice® Program.

Self renewing, odour destroying carpet treatment. Absorbs and decomposes gases from the source. Reduces common odours and improves indoor air quality.

Proven protection against bacteria, mould, mildew, fungi and controls dust mites. Ultra fresh gives lasting freshness and longer life to your carpet.

Barrier Bac impervious backing system also available. Polymeric membrane to protect the subfloor and contain spills associated with health and aged care facilities.

Fire Hazard Properties

All Beulieu MediCover ESD® floor coverings comply with the Building Code of Australia C1.10a Vol 1 Critical Radiant Flux Test for use in all healthcare facilities.

Face Fibre

Premium Solution Dyed Nylon = Resistain® - Permasoft®.

Recycled Content

All products contain some recycled content and we are accredited Ecobiz manufacturer.

Soil Release

3M Centrotex F7.

Construction / Ergonomics

High density, low profile construction.

Engineered to comply with Snook and Ciriello revised tables of maximum weights and forces.

Tested to AWTA HHC 3 and 4 for drag resistance and impedance to wheeled traffic.

Anti Static

Permanent anti-static guaranteed <3.5 kVa.

Indoor Air Quality / VOCs

Meets Carpet Institute Green Label Plus Standards for indoor air quality and thermal & acoustic comfort.

Installation

All Beulieu MediCover ESD® floor coverings must be installed by Beulieu Australia® installers and installed to Australian Standards AS2455. Please contact Beulieu Australia for approved adhesives and seam sealers, including low VOC options.

Warranties

Beulieu Australia® provides comprehensive Performance Warranties of up to 15 years on all Beulieu MediCover ESD® textile floor coverings.
